

BOTTOM OF BED

BASIC COMPONENTS

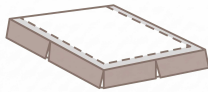

RESOURCE

GLOSSARY

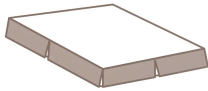

DECK

Made out of a 70/30 poly/cotton white fabric which spans the full width and length of the platform, holding the bottom of bed treatment in place. Decorative fabric is seamed to the platform to create the drop.

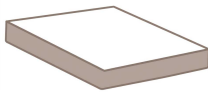

DECK STRIP

An additional 3"-4" of drop fabric added to 3 sides of the deck (sewn atop), minimizing the appearance when the box spring shifts or moves.

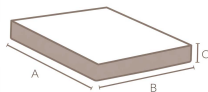

BEDSKIRT

A bottom of bed cover that begins at the top of the Box Spring and finishes ½" off the finished floor. This covers the box spring and the space below to the floor.

BOX SPRING COVER

A bottom of bed cover that begins at the top of the Box Spring and covers only the Box Spring, typically by 1" or less. Anything below the box spring will remain uncovered.

DIMENSIONS

Three measurements are needed for bottom of bed treatments; length, width & drop. Length (A) from head to foot and width (B) from one side to the other. The drop (C) is from the top of the boxspring to the end of decorative fabric.
